

Manufacturing Production Inventory Management Software

DESCRIPTION:

Our Manufacturing Production Inventory Management database software is a very useful tool for small to medium sized manufacturers managing their business; it comes with raw material inventory management module, and final products inventory management module, it address all of the manufacturing production needs from raw material purchasing, Economic order quantity (EOQ) raw material inventory management, final production inventory management, products sales, customers and suppliers management, and basic company administration and HR management functions. Its key features include:

- Generate raw material inventory list, with Economic order quantity (EOQ) feature. We calculate the Re-order point and get the optimal order quantities by using built-in EOQ model. It helps the business owner manage their inventory items in to an optimal mode and cut down their business cost. We will reduce the material inventory items number when they transfer to the final products.
- System will help you generate the raw material purchase order and add the new arrival items to the inventory list, also it save all your suppliers information on database.
- Generate final products inventory database for your recording your production inventory information.
- When you make sales, system will help you generate the sales order and automatically reduce products inventory items number from your final product inventory list. Also it will save all your customers information to customer's database.
- It comes with your company information and your employee database which allows you to easily track your employee information and all the sales and purchasing activities.
- You can easily generate the report for all sales record, purchase order record, inventory list records based on you need.

Compare with other warehouse inventory management software, this software are specially design for a manufactory production purposes, we define the inventory list in two categories (raw material and final product.) And handle them in deferent ways to fit in the engraving business need. Also our system is very flexible and easy to use, with an affordable price. It may be expanded to support more features and records by anyone with a basic knowledge of Microsoft® Access®.

BENEFITS:

- Save time by using a pre-designed template to manage your inventory. You can add more features based on your needs
- Saving money by spending your time on how to run your business instead design database application software.

- Reduce costly stock shortages by setting reorder tolerance levels appropriate for your business.
- Avoid for buying other expensive inventory management tool for your business.
- No learning curve, If you know how to use Microsoft® Access®, you know how to use our software.

SYSTEM REQUIREMENTS:
