

Web-based Membership Subscription Database Management Software

DESCRIPTION:

Our web-based Membership Subscription Management software is a powerful and flexible membership subscription and club members' management database software. It designs for small to mid size club, magazine, union membership management purpose. This software will help you manage your club member information, subscription payment information, membership benefit, member's schedule setup and membership types. You can access this management software through your IE browser anywhere around the world. It will handle your membership & subscription daily work, leaving you free to focus on your core business!

The key features of this software are:

- Generate member information management form for help you record all your subscribed members information. Include their payment, benefit, schedule information. Help you on tracking membership subscription purchases, renew and update for new and existing members.
- Manage your member in time frame, and generate the member near due, overdue list, you can review your member status very easy.
- Record members contact information.
- Record and manage your employees information
- Generate your subscription member payment report for you to review your income.
- Generate the payment invoice report for review.
- Manage and maintain a Multiple Membership Types and subscription period.
- This software will helping you one customer service and relationship management on maintain complete records of each customer's membership purchase history, subscription status, order history and changing expiration dates and membership types. Maintain complete records of all customer service records and view entire customer history at a glance.

All functions are accessible from a single simple form screen where you can accomplish various sales operations using our intuitive and elegant user interfaces. With little investment you not only get our web-based database templates but also Access 2010 source code. This way you can customize our web based membership subscription management software further as your

business grows. Business managers can also use custom filters, tagged searches and custom database arrangement to further customize and enhance the existing functionalities.

BENEFITS:

- Let the database engine behind Access. And the client does all the work.
- Web-based front end minimizes the installation issues, users need only a browser. The database doesn't care whether the user is sending requests via a Windows PC, a Mac or a machine running Linux
- Easy cross platform usage
- Simple security. Only the Web server's administrator has access to the database file.
- No version control problems and real portable. There is no need to install and run heavy-duty server side database on your laptop (client)
- Allow multiple users' access. Web interfaces are unbound. Once a page is loaded, the interface is no longer connected to the database. But a bound Access front end maintains a connection to the source, and Jet limits you to 255 concurrent connections.
- Save time by using a pre-designed template for your membership management use. You can add more features based on your needs
- Saving money by spending your time on how to run your business instead design business software.

SYSTEM REQUIREMENTS:

- Only need Microsoft Office Access 2010 in one the Web server's administrator (server end) and all other client computers ONLY need Windows, Mac or Linux OS and internet browser
- Need to have Microsoft Office 365 or a Access hosting service for publish to Access Service.
